

Wednesday Challenge Form

Group Members: Half of the Class

Problem Statement: The challenge was to
Make the smoothest boat tail possible, who ever
Had the smoothest wins the challenge.

Approach: The first day we had the challenge
We were trying to figure out what were going
To do, how tall, how wide. So the next day
We had the prototype already done so we just
Have to make the final product. I'm going to
Honest we did not do a good job on the WC.
The boat tail was really bad. I think I could have
Tried a little harder

Solution: We did not win from our design

Lessons Learned: The lesson I learned from
this challenge was to use my time wisely
